DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the first sentence of the specification should include the status of the parent applications (ie Pat. No.).

Appropriate correction is required.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 17-27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11 of prior U.S. Patent No. 6,743,452. This is a double patenting rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1761

5. Claims 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 21-22 recite "it". It is not clear what "it" is.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gosselin et al [Pat. No. 6,733,808], Guzowski et al [Pat. No. 6,962,724], Carabetta et al [US 2002/0064582A1], Lamp et al [Pat. No. 6,764,700], Lamp et al [Pat. No. 6,919,097], and Morris et al [US 2006/0013929A1] teach methods of making packaged food products.
